EDUCATION

• Georgia Institute of Technology

Atlanta, GA, USA

Ph.D. in Operations Research with a minor in Mathematics

August 2017-May 2022 (Expected)

- Advisor: Dr. Xu Andy Sun
- Thesis Advisory Committee: Drs. Santanu S. Dey, Renato D.C. Monteiro, Wotao Yin, and Enlu Zhou
- Relevant Courseworks: Linear/Convex/Nonlinear/Discrete Optimization, Machine Learning, Stochastic Process, Simulation, Numerical Analysis, Functional Analysis, Graph Theory

• Georgia Institute of Technology

Atlanta, GA, USA

B.S. in Industrial and Systems Engineering (ISyE)

August 2013-May 2017

- Capstone Project: Work Measurement Improvement for UPS Small Package Facility

B.S. in Discrete Mathematics

August 2013-May 2017

- Thesis: A MIP Formulation of the Unit Commitment Problem and Polytope Analysis

Research Interests

My research focuses on the theory and application of optimization. I am currently working on:

- distributed and decomposition algorithms for large-scale continuous/discrete optimization,
- theory and algorithms based on nonconvex augmented Lagrangian duality,
- convexification and smoothing in optimization, and
- sampling algorithms.

I am also interested in efficient and practical solution methods for nonconvex nonsmooth problems arising from data science and engineering fields.

Publications and Preprints

Alphabetical order is indicated by "*".

- 1. K. Sun and X. A. Sun. Dual Descent ALM and ADMM. Submitted to SIAM Journal on Optimization, arXiv preprint arXiv:2109.13214, 2021.
- 2. J. Liang*, K. Sun*, E. Zhou, and X. A. Sun. Log-difference-of-convex (Log-DC) sampling by the unadjusted Langevin Algorithm. Submitted to AISTATS, 2021.
- 3. A. Gholami*, K. Sun*, S. Zhang*, and X. A. Sun. Solving large-scale security constrained AC optimal power flow problems. Submitted to Operations Research, 2021.
- 4. K. Sun and X. A. Sun, Algorithms for difference-of-convex (DC) programs based on difference-of-Moreau-envelopes smoothing. Submitted to Mathematical Programming, arXiv preprint arXiv:2104.01470, 2021.
- 5. K. Sun, M. Sun, and W. Yin. Decomposition methods for global solutions of mixed-integer linear programs. Submitted to Mathematical Programming, arXiv preprint arXiv:2102.11980, 2021.
- 6. K. Sun and X. A. Sun. A two-level ADMM algorithm for AC OPF with convergence guarantees. *IEEE Transactions on Power Systems*, 2021.

7. K. Sun and X. A. Sun. A two-level distributed algorithm for nonconvex constrianed optimization.

Submitted to Computational Optimization and Applications, arXiv preprint arXiv:1902.07654, 2019.

EXPERIENCE

• Georgia Institute of Technology

Atlanta, GA, USA January 2017-Present

Graduate Research Assistant

- Decomposition and distributed algorithms for large-scale nonconvex constrained programs.
- First-order algorithm for difference-of-convex (DC) programs.
- Research collaboration with ISO New England on decentralized OPF:
 - * applied ADMM on SOCP-OPF to achieve decentralized computation and recovered feasible AC solution;
 - * implemented the algorithm in Python and submitted a technical report.

Graduate Teaching Assistant

- ISyE 6669: Deterministic Optimization

Spring 2018 and Fall 2018

- ISyE 6644: Simulation and Modeling for Engineering and Science

Spring 2018

- ISyE 3103: Introduction to Supply Chain Modeling: Logistics

Fall 2017

• Alibaba US-Damo Academy

Research Intern at Decision Intelligence Lab

Bellevue, WA, USA June 2020-August 2020

- Mentors: Dr. Wotao Yin, Dr. Jian Tan, and Mou Sun.
- Studied generic two-block mixed-integer linear programs (MILP) with block angular structures.
- Proposed an ALM-based decomposition framework and an ADMM variant with convergence guarantees.
- Demonstrated the exactness and efficiency of the proposed algorithms on various MILP problems.

GRID OPTIMIZATION COMPETITION

I have been participating in the ARPA-E Grid Optimization Competition (GO Competition). Entrant teams from around the globe thrive to develop innovative algorithmic softwares for modern power grids in the form of coding competition. I am a member of the GMI-GO team led by faculty advisors Prof. X. Andy Sun (PI) and Prof. Santanu Dey.

• ARPA-E Grid Optimization Competition Challenge 1

GMI-GO Team Member

November 2018-February 2020

- Problem: Security-constrained AC Optimal Power Flow (SC-ACOPF) under time limit.
 (In optimization language, this is a large-scale + two-stage + mixed-integer nonlinear program.)
- Our Approach: We deployed various optimization techniques in C++, including:
 - * smoothing techniques for disjunctive constraints;
 - * outer approximation of second-order cones;
 - * a convergence-guaranteed distributed algorithm through MPI;
 - * an effective contingency screening method;
 - * extensive engineering tuning and experiments of Ipopt, Gurobi, and Mosek;
 - $\ast\,$ various safe-guarding mechanisms for robust solution output.
- Result: Our team ranked in third place in the Final Event, receiving \$400,000 research grants award.

• ARPA-E Grid Optimization Competition Challenge 2

GMI-GO Team Member

August 2020-October 2021

- Extension of SC-ACOPF with additional complicated constraints:
 - * unit commitment, line switching, discretized tap ratio and phase shift.
- Result: Our team was among the competition prize winners, receiving a total of \$120,000 research grants award:
 - $\ast\,$ third place in off-line divisions of Challenge 2 Trial Event 3 (\$60,000);
 - * fifth place in real-time divisions of Challenge 2 Final Event (\$60,000).

Awards and Honors

• Prize-winning team in ARPA-E Grid Optimization Challenge 2

October 2021

• SIAM Conference on Optimization (OP21) Student Travel Award

Summer 2021 February 2020

• Third-place team in ARPA-E Grid Optimization Challenge 1

Time place team in 111(111 L offer optimization chance

McLean Fellowship Stipend

• ISyE Stipend

Fall 2018 and Spring 2019

Fall 2017 and Spring 2018

INVITED AND CONTRIBUTED TALKS

- Algorithms for DC Programs Based on DME Smoothing
 - SIAM Conference on Optimization (OP21), Virtual, July 2021
 - INFORMS Annual Meeting, Anaheim, CA, USA, October 2021
- Decomposition Methods for Global Solutions of Mixed-Integer Linear Programs
 - Integer Programming and Combinatorial Optimization (IPCO) Workshop (poster), Virtual, May 2021
 - Mixed Integer Programming (MIP) Workshop (poster), Virtual, May 2021
- A Two-level ADMM Algorithm for AC OPF with Global Convergence Guarantees
 - Power Systems Engineering Research Center (PSERC) Meeting (poster)
 - * Phoenix, AZ, USA, December 2017
 - * Wichita, KS, USA, May 2018
 - Georgia Tech Workshop on Electric Energy Systems and Optimization (poster)
 - * Atlanta, GA, USA, November 2018
 - * Atlanta, GA, USA, November 2019
 - INFORMS Annual Meeting, Virtual, October 2020
- Distributed Algorithms for Sparse Regression
 - INFORMS Annual Meeting, Seattle, WA, USA, October 2029
- A Two-level Distributed Algorithm for Nonconvex Constrained Optimization
 - INFORMS Annual Meeting, Phoenix, AZ, USA, October 2018
 - International Conference on Continuous Optimization (ICCOPT), Berlin, Germany, August 2019

SERVICE

- Session chair for Forecasting/Accounting and Nonlinear Programming, INFORMS Annual Meeting 21, Anaheim, CA
- Co-chair of the session Distributed and Decentralized Optimization, ICCOPT 2019, Berlin, Germany
- Reviewer for MPC, JOTA, IEEE (TAC, TCNS, TII, TPWRS, TSG), ACC, CDC, IET, Quantum

TECHNICAL SKILLS

- Programming Languages: working knowledge of C++, Julia, Python, and Matlab.
- Optimization Solvers: experience with IPOPT, Gurobi, Mosek, Baron, Bonmin, Couenne, and Xpress.
- Typesetting: LATEX and Markdown.
